Replacement of Court/Jail Video Arraignment System
Request For Proposal**

Introduction

1 Purpose RFP Scope and Equipment Specifications

The Purpose of this (RFP) is to solicit sealed proposals for hardware, software, services and ongoing support to provide the Seventh Judicial Courts and Sangamon County Jail and Juvenile Facility with reliable, video technology. This system will replace our current system which is at the end of its life cycle. The current system is a Tandberg video conferencing system. The system runs on a virtual network and is isolated. It is not recorded or ported to any other system. All hardware is original and has run continuously since 2010. Our current locations are Courtroom 5C, 7C, Jail Holding first floor and Jail Classroom located on the third floor. The courtrooms are equipped with two fifty five inch monitors. There is one monitor for the judge and attorneys and a second monitor for the public gallery. It is controlled via Crestron touch screen located on the judge's bench. The system allows the Judge to choose which endpoint in which they wish to communicate. When activated the system homes the camera on both ends, activates the sound and turns on all monitors. The system interfaces directly with the courtroom sound system so all may hear. In the jail facility sound is routed to an external speaker. The judge has a boundary microphone located on the judge's bench. In the jail the boundary microphone located above each system. The jail locations are housed within a locked vandal resistant metal and Lexan enclosure forcibly vented with fans. The system runs on Cat 5 hardware with a fiber backbone and Cisco switches.

The replacement system will encompass the endpoint hardware (camera, codec, monitors and controls). In each courtroom two boundary microphones will be added to the system located on the defendants and plaintiffs table. The control system shall be simple in operation and follow the format that is currently in use.

The systems are in use daily. It will be imperative that one system at minimum is available at all times. Installation scheduling will need to be coordinated. Installation can be performed during regular working hours.

Courtroom 7A is not currently a part of the Tandberg system. New equipment will be installed in 7A and the Juvenile Center. The additional system will mirror the current setup. There is a fiber connection between the Juvenile Center and the County building.

This system shall be a "turn-key" system with all equipment and software in a working ready state when the courts takes final delivery.

1.2 Project Timeline

The timeline must take account for supply chain issues and the fact that some equipment may be unavailable at the time of purchase. While this is an issue Sangamon County will not allow for deviation in specified equipment standards unless it can be provided in writing that the replacement item(s) will be of equal or greater quality. All hardware should be available at the time of installation.

All phases are projected from the Vendor Contract Signing.

Month 1

1. Order equipment
2. Jointly develop detailed project plan for migration to replacement video conferencing equipment and software.
3. This plan should include adjustments for live court and video availability. This is to minimize system downtime or error corrections.
4. Finalize plans and commit to an installation timeline based on equipment availability.

Month 2

1. Install equipment according to project plan.
2. Test and verify equipment.
3. Implement standardized error/issue reporting procedure from the end user for expeditious review and repair by software/service vendor.
4. Personnel training final roll out phase.

These phases represent best estimates at this time and may be adjusted as the project progresses. The Client is soliciting input from the Vendor to optimize the timeline based on their experiences.
